KADECO AWNINGS: YOUR MADE-TO-MEASURE ONE-OFF

Holidays at home. Laughing, eating and celebrating together. It is moments of happiness, big and small, that make life so precious. With your made-to-measure awning from KADECO, you can enjoy those carefree moments out in the fresh air with your favourite people - and make your patio or conservatory your personal favourite place.

HANDMADE QUALITY

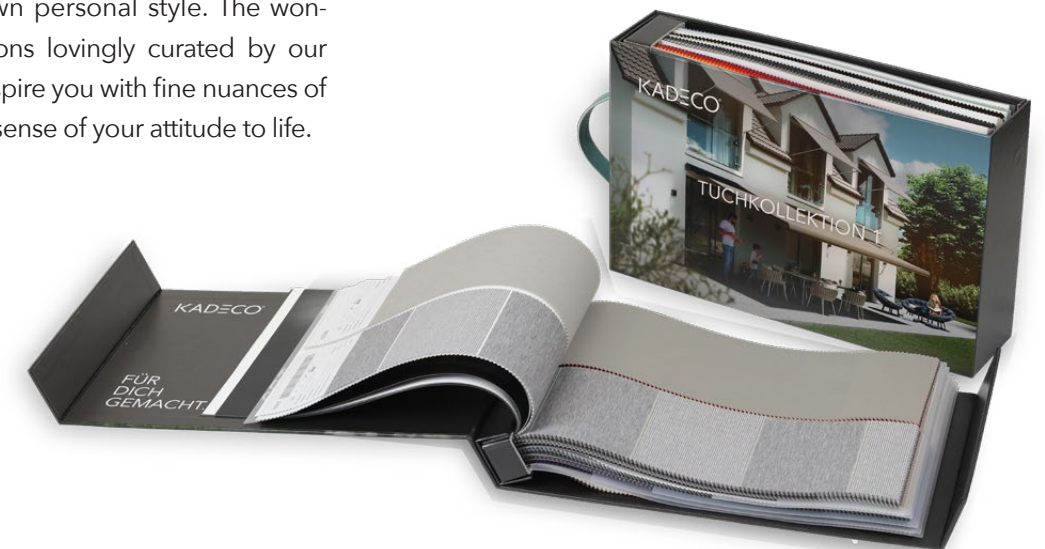

We love quality based on conviction. You can see and feel our attention to detail every day in the way we select our materials and manufacture by hand to create your KADECO quality product. And special endurance tests demonstrate again and again that our particular quality standards guarantee you extreme durability, longevity and above all, long-term enjoyment of your awning.

Attention to detail: our sun protection specialists making your customised KADECO awning

WE ♥ DESIGN

At KADECO we know that the magic is in the detail - and that applies to the functionality of your awning just as much as its design. With our wide selection of exclusive colours and fabrics, you can achieve your own personal style. The wonderful fabric collections lovingly curated by our creative teams will inspire you with fine nuances of colour and a unique sense of your attitude to life.

5 YEAR WARRANTY

QUALITY BASED ON CONVICTION

HANDCRAFTED - MADE IN GERMANY

KADECO awnings are produced at our headquarters in East Westphalia, Germany. We continually invest in our company to ensure we have the latest production facilities and optimum, sustainable processes.

DURABILITY

All our components satisfy high quality, safety and environmental standards. Aluminium profiles are reliably protected from the weather by our in-house powder coating.

SAFETY

 Our products are tested to European standard DIN EN 13561. The CE marking on our products confirms the highest quality materials and functional safety.

PLAYING SAFE

Look forward to spending wonderful, care-free hours beneath your KADECO awning. Our awnings are robust, long-lasting and low maintenance. The high quality standard of our awnings will give you years of enjoyment. Which is why we find it easy to offer you an extended 5-year warranty*.

Patio awning 230

WE LOVE WHAT WE DO.

CUSTOMER FAVOURITE AWARD

Our customers love KADECO: we are right at the front with numerous awards including one from the “Everyday Customer Favourites” survey. Focus Money curated the most popular brands once again in 2020 and we are pleased to receive a

Gold award for the second time. This appreciation makes us especially proud and we see the wonderful feedback above all as praise for the commitment of our employees and retail partners.

WE LOVE STRONG DESIGN.

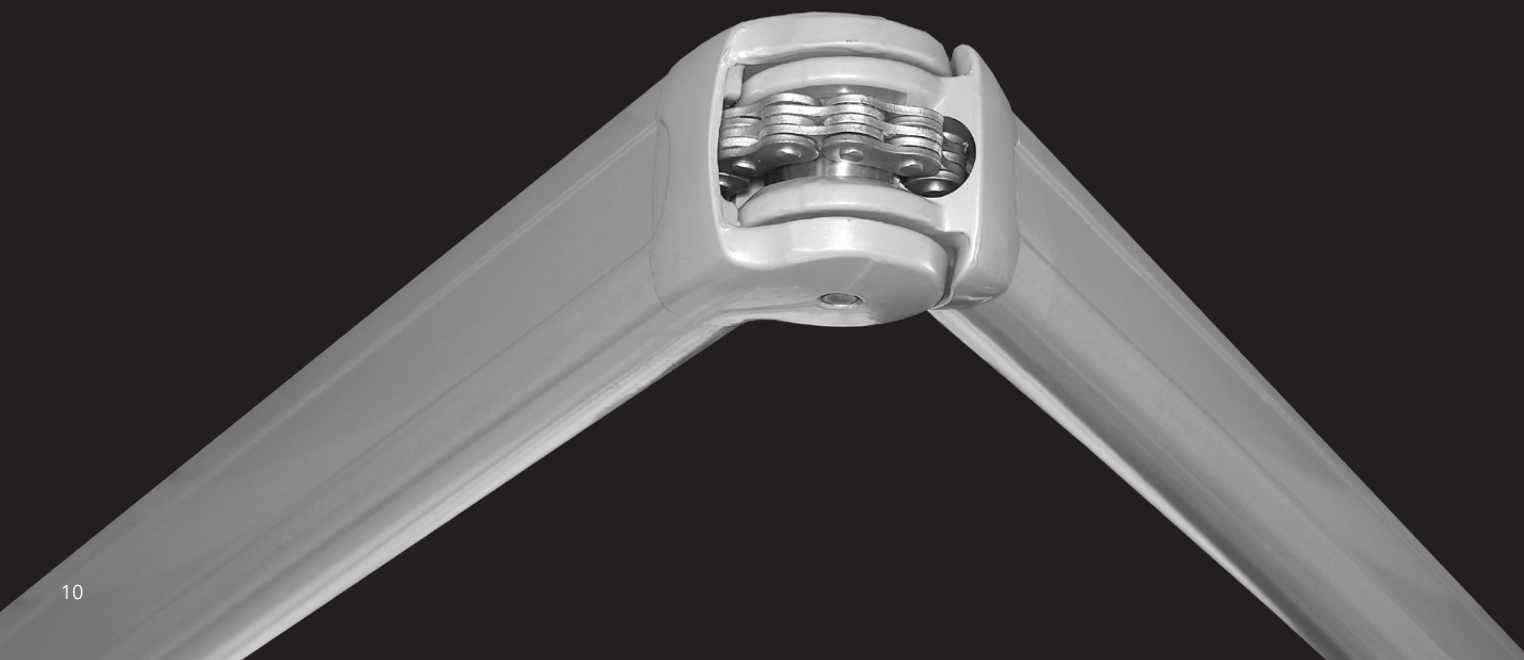

THE TRIED AND TESTED KADECO ARM

Our KADECO products for outdoors are synonymous with superior robustness coupled with aesthetic design for an enjoyable outdoor feeling - a standard which we also meet in the details: our sophisticated KADECO arm features total stability and reliability even when exposed to strong wind. It is maintenance-free, wear-free and very robust because we only use high-quality and especially long-lasting

materials, especially for the moving parts such as the central chain redirection.

YOUR BENEFITS:

- no unsightly abrasion on the surface finish
- no inconvenient maintenance
- guaranteed long enjoyment of your awning

AWNING MODELS

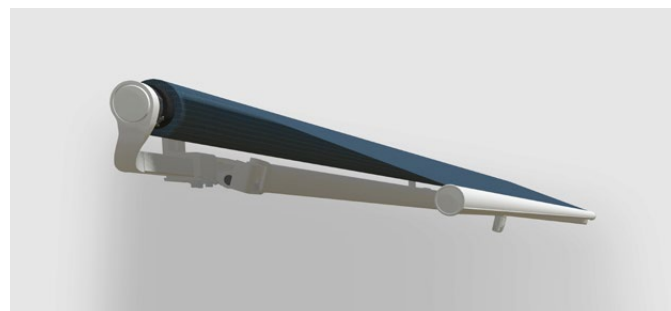

*Made
for you*

KADECO PATIO AWNINGS

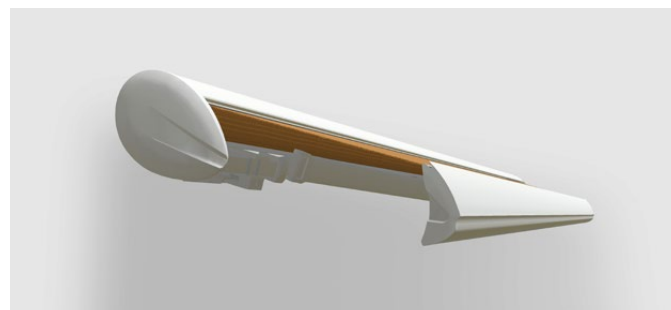

Design your favourite place outside: thanks to the broad selection of patio awnings, you will find the right model for your structural and design specifications.

Open folding arm awnings 16

The classic design with vintage flair

Side awnings 30

MODEL 630

Retractable side privacy shield

OPEN FOLDING ARM AWNING 110

EXPOSED WITH SUBTLE DETAILS

Show off your sense for aesthetics with our design awning 110 and relax under this sun protection system with a filigree look. An optional protective cover protects your fabric when it is retracted.

- open design awning
- only high-quality steel and aluminium components – no plastic
- optional protective cover
- coupling up to 12 m wide possible
- bespoke, hand-crafted quality product
“made in Germany”
- 5-year KADECO warranty

Optional protective cover

SEMI-CASSETTE AWNING 210

MODERN AND COMPACT

Our semi-cassette awning 210 features a contemporary design and compact shape. Its attractive, rounded form is sure to catch the eye on your patio or balcony. The robust, downwardly open semi-cassette protects the retracted awning fabric from the elements. This awning will bring you pleasure for many years to come!

- elegantly designed semi-cassette
- stable folding arms with high-performance flyer chain in middle joint
- choice of 20 standard RAL colours at no extra charge
- personal choice of colours from the RAL chart can also be produced
- 5-year KADECO warranty

Robust folding arms

CASSETTE AWNING 300

DISCREET WITH SUBTLE CURVES

Perfectly protected beneath our patio awning 300: experience lots of beautiful moments under this awning! You can rely on it to protect you from the sun for many years thanks to its stable technology. Your awning fabric will be protected from the elements when it is retracted.

- slimline cassette design
- low number of fastening points required
- high angle of slope possible
- bespoke, hand-crafted quality product
"made in Germany"
- 5-year KADECO warranty

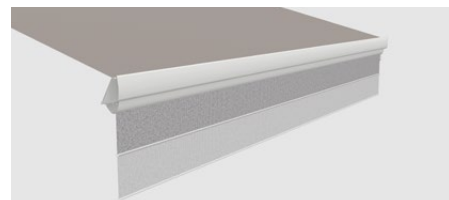

Super-slimline look

CASSETTE AWNING 330

INCIDENTALLY: This model is also available as a semi-cassette awning 230.

Optional Vario valance, height-adjustable

BIG WITH STRONG ARMS

Create your own personal bastion of calm with our cassette awning 330. Thanks to its robust folding arms, our "big" model is a winner even for large and combined systems with its maximum stability and resilience.

Moreover, the awning has an integrated rain drainage channel and is secured against the impact of the wind for extra safety - which means it sits securely against the wall even in gusty winds. If you choose to give your effective sun protection a break every now and then, it will be safely stored away in a cassette mounted on the wall.

- large cassette awning
- high stability
- perfectly secured against wind and weather
- bespoke, hand-crafted quality product
"made in Germany"
- 5-year KADECO warranty

CASSETTE AWNING 360

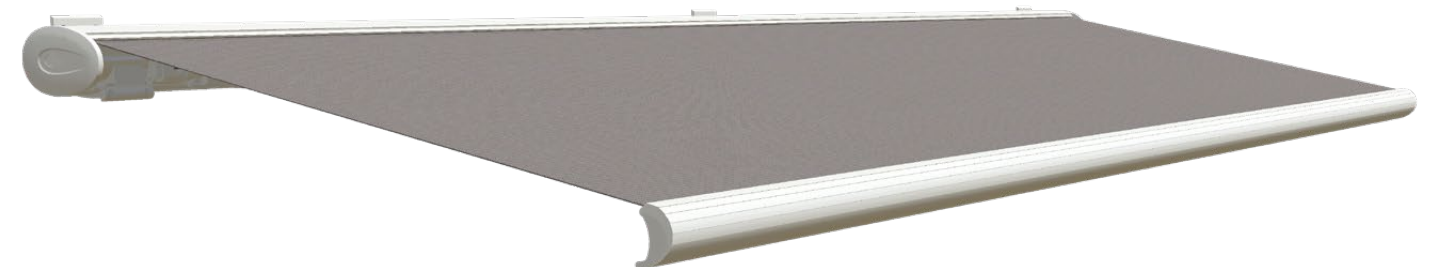

DURABLE WITH CASUAL ELEGANCE

Love tranquillity, durability and elegance? This is what our cassette awning 360 stands for, providing elegant protection from sunlight and UV radiation and setting quality standards. The slim cassette fully encloses the retracted awning and will attract the admiring looks of your friends with its subtle appearance.

- slimline cassette design
- perfectly secured against wind and weather
- quiet operation
- bespoke, hand-crafted quality product
“made in Germany”
- 5-year KADECO warranty

Integrated rainwater drainage channel

CASSETTE AWNING 380

SQUARE WITH A HEART FOR DESIGN

Choose our model 380 for a contemporary patio awning that will inspire a new trend in aesthetics and make your heart leap! Its cubic structure creates elegant accents against modern architecture: at the heart of the design is a square, full cassette which fully protects your awning when retracted. Thanks to the optional Vario valance, you are still protected from low sun in the early evening hours. Leaves nothing to be desired!

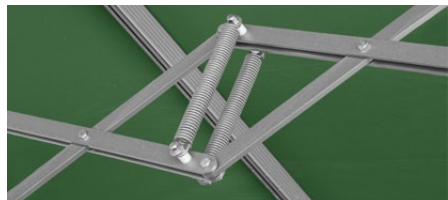

- modern, square full cassette
- high stability
- optional integrated LED lighting
- motorised Vario valance
- simple and flexible installation
- bespoke, hand-crafted quality product
“made in Germany”
- 5-year KADECO warranty

Optional integrated LED lighting

SCISSOR ARM AWNING 186

Robust scissor arms

VINTAGE-STYLE SHADE

Whether at home, a restaurant or hotel: the classic look of your awning is bursting with authenticity and emphasises your style-conscious ambience with a hint of the historical. The classic one amongst exterior sun protection products has timeless aesthetic appeal in a vintage style and the amazing mechanics of interlocking scissor arms, which lend more stability to your awning.

- classic, historical look
- large areas of shade possible
- particularly suitable for restaurants and hotels
- extremely high stability
- extensive choice of 20 standard RAL colours at no extra charge
- bespoke, hand-crafted quality product "made in Germany"
- 5-year KADECO warranty

SIDE AWNING 630

SUN PROTECTION SHOWS ITS BEST SIDE

Our retractable side awning is the perfect complement to your sun protection from above. It will protect you from people on the outside looking in, light winds and the low sun. In one simple action, the awning is extended out of the cassette and fixed in position – and returning it to its retracted position is just as simple.

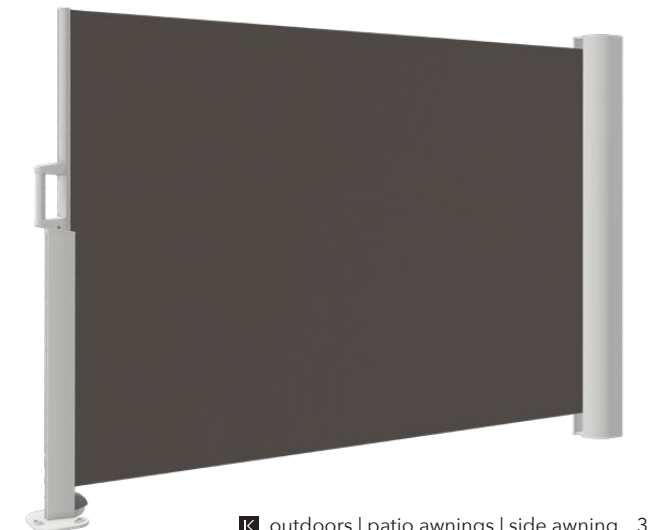

- side wind protection and privacy shield
- sloped version possible
- optional child safety device
- easy, convenient operation
- controlled, safe retraction
- extensive choice of 20 standard RAL colours at no extra charge
- bespoke, hand-crafted quality product “made in Germany”
- 5-year KADECO warranty

Roller-assisted retraction

Attachment to post with childproof lock

FRAME COLOURS & FABRICS

*Made
for you*

FRAME COLOURS

Cassette awning 380

OUR TREND COLOURS

The aluminium frames of our KADECO awnings are already available in 20 contemporary RAL colours as standard and are carefully coated in our own production facility. Depending on the characteristics of each colour, this produces high-quality matt, satin or shimmering surfaces with a smooth finish or subtle texture.

Thanks to our modern powder-coating facility, we can also produce your personal choice of colour from the entire RAL chart, which means you can coordinate your awning perfectly with your façade, conservatory or patio roof and your personal colour scheme.

Colour characteristics:
*GG = satin / gloss, *GM = satin / matt,
*GS = satin / silk gloss, *F = microstructure,
*FM = metallic microstructure, *PM = pearlescent matt

FABRICS

BEAUTY IN PERFECTION

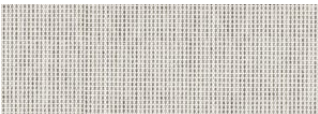

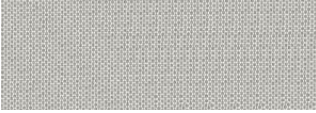

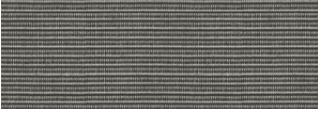

We pay special attention to the careful selection of our KADECO awning fabrics: with our extensive collection of designs, you can turn your ideas of the appearance into reality whilst matching the protective function of the awning fabric with your precise needs - from durable fabrics right through to special weatherproof designs.

OUR CLASSIC

ACRYLIC - PLAIN AND PATTERNED
KADECO acrylic fabrics consist of 100% spun-dyed thread.

High-quality colour pigments are embedded directly into the fibres during the production process, creating an especially fade-resistant and resilient woven fabric with textile properties.

Acrylic fabrics have been used successfully in awnings for decades; they are dirt-repellent and feature a high UV resistance so you can enjoy the radiant colours of your awning fabric for years to come.

Semi-cassette awning 210

OUR FUNCTIONAL FABRICS

POLYESTER - A STRONG WOVEN FABRIC

Our woven polyester fabric is a spun-dyed material with a very high level of UV resistance that is slightly thinner and lighter than standard awning fabric made of acrylic. It is less prone to creasing so it retains its stable shape. These fabrics are absolutely ideal for heavy-duty use and large awnings.

ALL WEATHER - MORE THAN JUST TEXTILE SUN PROTECTION

All Weather awning fabrics have an acrylate coating on one side for greater resistance to water pressure.

PRÉCONTRAINT® - IN SUNSHINE OR RAIN

Précontraint® is a resilient woven polyester fabric with a PVC coating and varnish finish on both sides. The UV-resistant coating makes the fabric less prone to sagging while at the same time making it 100% water-proof.

FLAME RESISTANT

In the context of structural fire safety, it is said that the best protection starts with prevention – by reducing fire loads. This also relates to the features of awning fabrics.

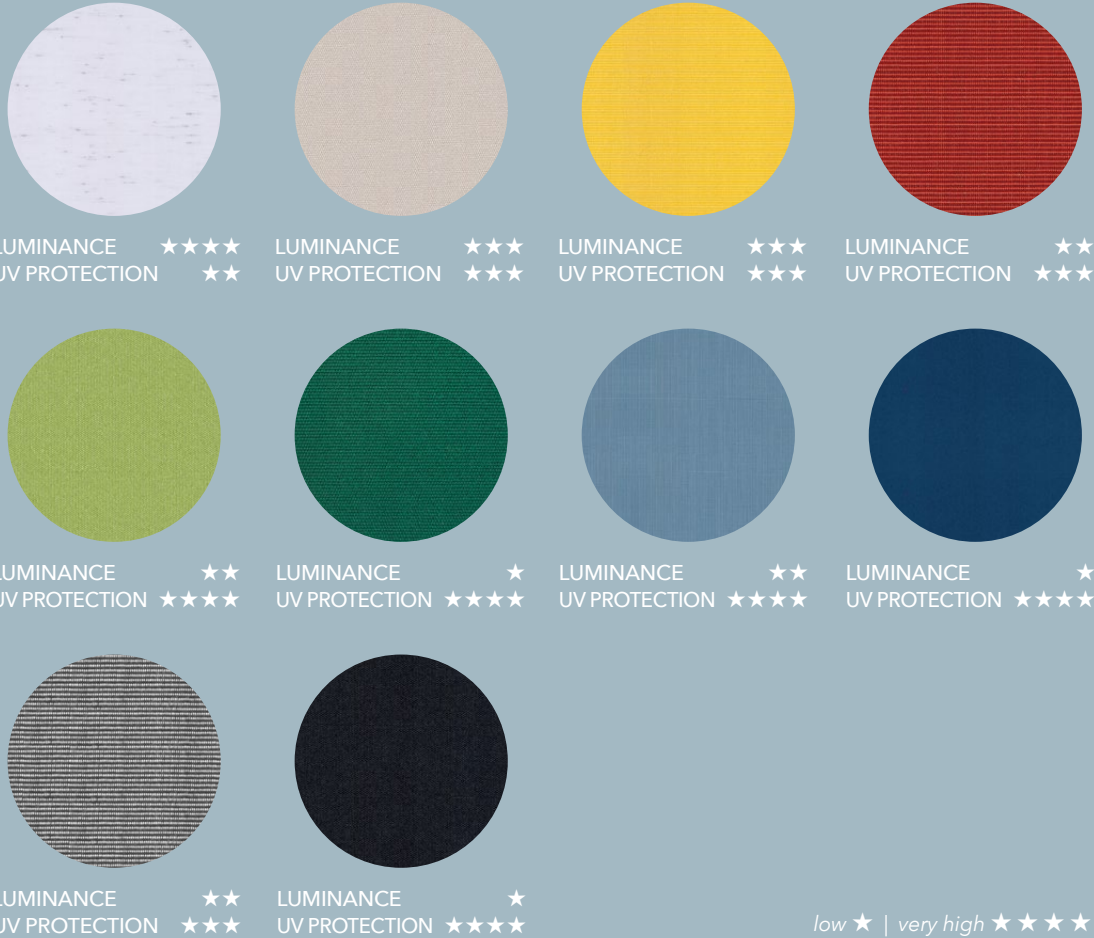

REFLECT® - REFLECTIVE HEAT PROTECTION

Reflect® awning fabrics are made of 100% spun-dyed acrylic with an additional weather-proof coating, producing a highly reflective surface that is four times better at blocking thermal energy than conventional fabrics. The result: cooler rooms and lower energy costs for air conditioning systems.

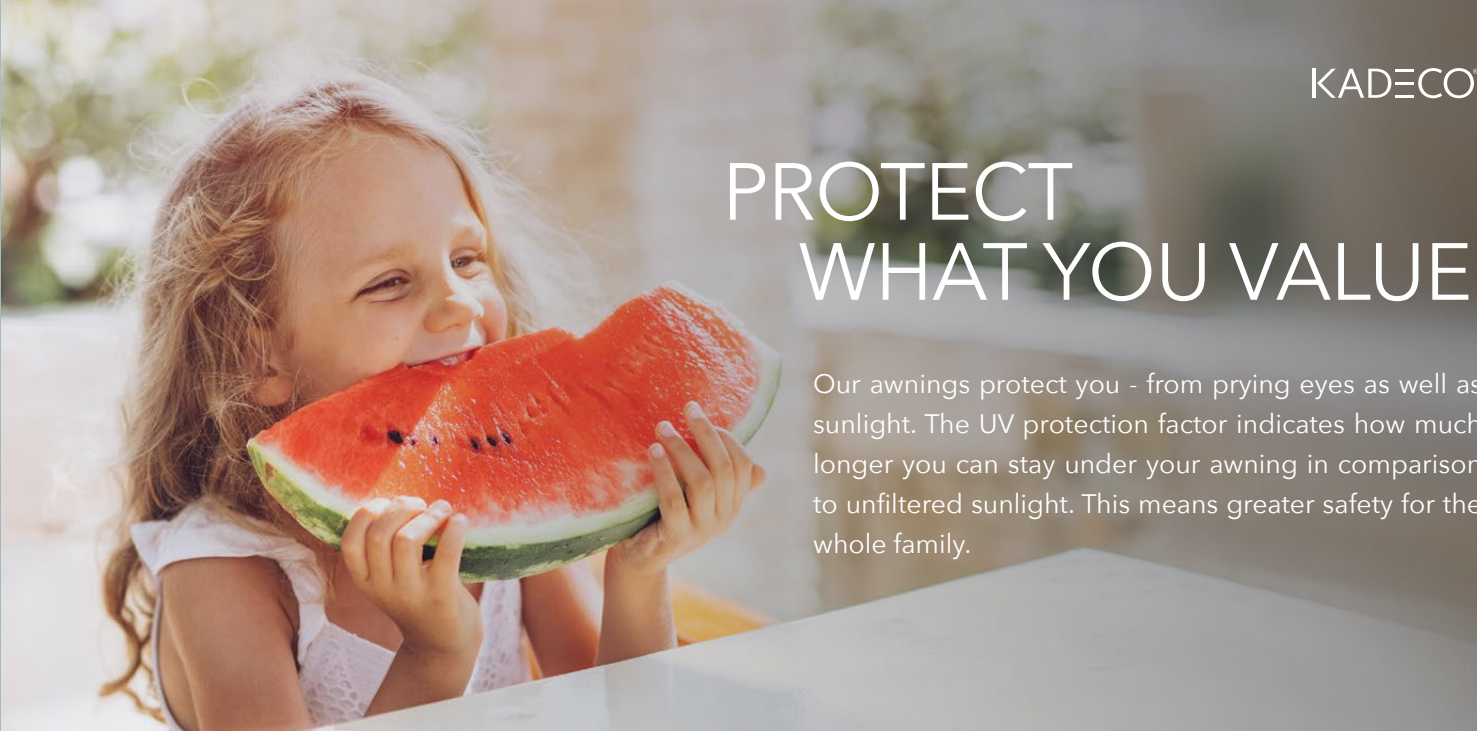

BY THE WAY: the side awning 630 is also available with Screen and Reflect® AIR woven fabrics.

CHOOSE YOUR FABRIC COLOUR

The colour of your awning fabric is a key design element. It affects the climate of the patio beneath your awning as well as the atmosphere of the room behind. Lighter colours are much better at reflecting sunlight and brightening up the surrounding area than darker colours, which absorb more of the sunlight. To see what impact the colour has on luminance and UV protection, please see the examples below.

PROTECT WHAT YOU VALUE

Our awnings protect you - from prying eyes as well as sunlight. The UV protection factor indicates how much longer you can stay under your awning in comparison to unfiltered sunlight. This means greater safety for the whole family.

WHAT IS YOUR SKIN'S NATURAL SELF-PROTECTION TIME?		RESPONSE OF UNPROTECTED SKIN TO 30 MINUTES OF EXPOSURE IN JUNE	SKIN'S SELF-PROTECTION TIME minutes	SELF-PROTECTION TIME UNDER AWNING IN MINUTES WITH PROTECTION FACTOR			
1	Skin: noticeably fair, pale Freckles: dense Hair: reddish Eyes: green, blue or - in rare cases - brown	Always results in severe and painful sunburn, no tanning	5 - 10	150 - 300	200 - 400	300 - 600	400 - 800

READY FOR YOU

QUALITY FABRICS PERFECTLY FINISHED

From classic block and multi-stripes to plain colours and transparent screens: our fabric collection encompasses over 200 awning fabrics. We always fit our fabrics with the greatest possible precision on state-of-the-art systems.

OEKO-TEX® STANDARD 100

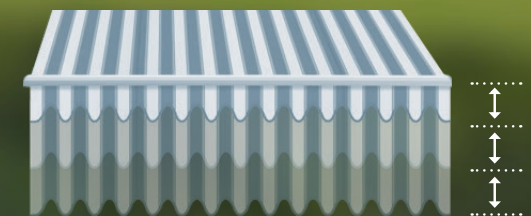

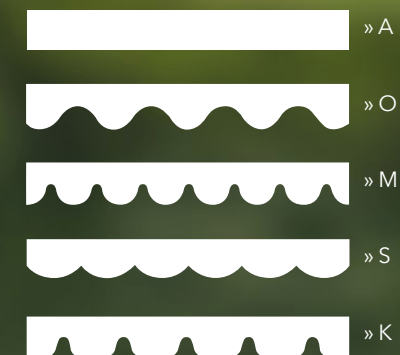

Textiles marked with the OEKO-TEX® Standard 100 label satisfy the strictest requirements: they are produced using environmentally friendly processes from materials that have been tested for harmful substances and under safe and socially responsible working conditions. This means we guarantee that the respective fabrics in our collections are low in harmful substances and free from chemicals that are harmful to health.

KADECO

VALANCES

A classic design element for patio awnings and additional shade when the sun is low, a valance fulfils two key functions at the same time. You can decide whether you want to decorate your awning with a playful scalloped edge or a straight line to suit your own personal style. Do you want to

design your awning to be even more flexible? On some awning models with our KADECO Vario valance you can decide for yourself how far to extend the valance depending on the sunlight and lighting mood. Turn to page 32 to find out which awnings you can fit with a Vario valance.

You can extend and retract the KADECO Vario valance to where you want it depending on the model, position of the sun and desired light atmosphere.

MOTORISATION, CONTROL & COMFORT

*Made
for you*

YOUR MOTOR DRIVE & CONTROL OPTIONS

STRAIGHTFORWARD AND CONVENIENT

Equipped with the relevant technology, tiresome cranking becomes a thing of the past - we supply our awnings with motor drives which are operated via a wall switch as standard.

Wireless controls and manual crank mechanisms are also available as options, depending on the model. Or automate your home - with innovative technology and the TaHoma® Smart Home app.

DURABLE QUALITY

The components in your awning control system are completely maintenance-free and designed for use outside. The high-performance motor has an impressively long service life and thousands of cycles.

JUST SWIPE

Activate numerous functions with the simple press of a button - or even automate them depending on the time of day or position of the sun, for instance. From the comfort of your sofa, whilst relaxing on the patio or quickly by app when you are on the go.

TAKING CARE OF YOU AND THE ENVIRONMENT

Intelligent controls don't just pay off when it comes to your comfort and convenience, but also ensure a balanced energy footprint. Because, depending on the product, heating costs are saved in the winter and air conditioning costs are saved in the summer. The sun is used to heat up a conservatory, for example, or when it is too intense, it can be kept out of the room effectively.

COMFORT OPTIONS

MAKE YOURSELF COMFORTABLE

Whether clever operating versions, useful safety functions or comprehensive features and details, with us you have the opportunity to adapt your awning perfectly to your needs and equip it for an all-season wellbeing area.

FUNCTIONAL CONTROLS

Thanks to our large selection of wall and hand-held transmitters you can choose various operating options and functionalities depending on your selected motor drive.

SMART CONTROL WITH IO

Choose the io radio-controlled motor with bidirectional technology and enjoy almost limitless possibilities: use your smartphone as a simple controller, programme time-controlled scenes and create automated processes, simulating your presence while you relax on holiday, for example (see also page 42).

WIND SENSORS

If the wind picks up, your awning retracts automatically thanks to the wind sensor and is therefore protected from the elements. An important safety aspect if you happen to forget about your awning or a storm is brewing.

SUN SENSORS

The sun sensor enables the awning to extend automatically when the sunlight is intense. This means your indoor space will stay optimally protected from the heat and your rooms will be pleasantly cool.

HEATER

You can even enjoy your outdoor space or entertain your guests on cooler days or in the evenings, for instance: with our designer heaters, your patio, conservatory or balcony will feel comfortably warm. Thanks to their short-wave infrared beams, our heaters are much more effective and consume less energy than gas-powered patio heaters or quartz radiators.

MAKE YOUR OWN MAGICAL EVENING MOOD

Indirect mood lighting turns your patio into your favourite place. Discreet LED light strips in cool to warm white set into the folding arms create a quite special atmosphere on your patio at the touch of a button - and save energy too.

SMART LOOK, EASY TO INSTALL

The Somfy TaHoma® Switch is very easy to install and features an attractively smart and subtle design. It is connected to your home network via WLAN.

MODULAR EXTENSIBILITY

Once you have set up your Somfy TaHoma® Switch, you can easily integrate other areas of your home technology and extend them at any time thanks to numerous interfaces and complementary products.

INTUITIVE, VERY EASY OPERATION

With Somfy smart-home-ready products and TaHoma® Switch connected to the internet, you can control your awning intuitively using a voice assistant or your smartphone. Relax your way through the day with personalised switching times and automated daily routines.

SMART APP OPERATION

With the TaHoma® Smart Home app you can easily control your awnings from your smartphone or tablet. One special feature of this technology is that it provides digital feedback, which means you can always check the app to see whether your awning is currently extended or retracted and can manage and control it remotely.

EXTRA SECURITY

When you use the presence simulator, timers can be set for your awnings and lights so your house and outdoor area always look occupied even if you are out - effective protection against burglars.

IO – THE BASIS OF YOUR SMART HOME

The io bidirectional radio technology from Somfy is the intelligent solution and basis for the integration of your awning into your smart home. Thanks to smart-home-ready products and the TaHoma® Switch home

automation hub, which is available separately, not only do you control your privacy and sun protection but you can also automate your entire house.

OUR AWNING RANGE

*Made
for you*

KADECO PERGOLA AWNINGS

Create your own personal outdoor spaces: these flexible shades can be produced to your wishes – with various sizes, equipment and installation solutions.
